## **VOLUNTARY ANNOUNCEMENT LAUNCH OF TRIVITRON DIGITAL AI**

This announcement is made by Peking University Resources (Holdings) Company Limited (the “**Company**”, and together with its subsidiaries, the “**Group**”) on a voluntary basis.

### **PARTNERSHIP WITH TRIVITRON HEALTHCARE TO LAUNCH TRIVITRON DIGITAL AI**

The Company is pleased to announce that ResoHealth (the Group’s health arm based in Dubai), in partnership with Trivitron Healthcare, has launched Trivitron Digital AI, a groundbreaking digital health initiative designed to revolutionize healthcare delivery in Tier-2 and Tier-3 hospitals across India. This strategic collaboration will address the pressing need for advanced digital infrastructure in India.

Trivitron Digital AI combines the strengths of Trivitron Healthcare and ResoHealth to deliver innovative solutions that transform how hospitals manage patient care, data, and engagement while driving interoperability and operational efficiency.

Trivitron Digital AI aims to bridge the digital divide by equipping hospitals with integrated, cloud-based solutions that enhance operational efficiency and enable AI-driven, patient-centric care.

The platform features a comprehensive suite of tools, including:

- **Lab Information System (LIS):** Enhancing sample tracking and remote result approvals.
- **Web-PACS:** Providing secure web access to imaging studies for improved clinician collaboration.
- **Personal Health Record (PHR):** Offering a mobile-first approach for patients to manage their health information.

Developed to meet global standards (HL7, FHIR, DICOM, HIPAA, GDPR, ABHA), these interoperable solutions require minimal additional infrastructure, making them especially suitable for less digitally advanced regions.

**Trivitron Digital AI** will be lead by Dr. G.S.K. Velu, Chairman & Managing Director of Trivitron Healthcare, and Dr. Vas Metupalle.

Dr. G.S.K. Velu emphasized the critical shift in healthcare towards integrated digital ecosystems: “With Trivitron Digital AI, we are laying the foundation for mid-sized hospitals and diagnostic networks to deliver high-quality, transparent care, irrespective of their geographic location”.

Dr. Vas Metupalle elaborated on the platform’s focus on patient empowerment and usability, enabling seamless management of healthcare information.

In addition to India, Trivitron Digital AI plans to expand into Africa, the Middle East, and Southeast Asia, addressing similar healthcare challenges and enabling hospitals in these regions to benefit from connected care solutions.

This launch represents a significant milestone in our commitment to democratizing digital healthcare access globally. By merging interoperable platforms with AI-driven automation, Trivitron Digital AI is set to redefine healthcare delivery as inclusive and accessible for all.

By order of the Board  
**Peking University Resources (Holdings) Company Limited**  
**Wong Kai Ho**  
*Chairman of the Board*

Hong Kong, 9 January 2026
